

10X ViBuffer A

Product No : RB0201
Packaging : 5 x 1ml

Lot :
Expiry Date :

Store at -20 °C info@vivantechnologies.com

Description:

General reagents used for various PCR reactions.

Application :

Generally used in various PCR reactions with Vivantis thermostable DNA Polymerases.

For Research Use Only

Buffer Composition :

500mM KCl
100M Tris-HCl (pH 9.1 at 20 °C)
0.1% Triton™ X-100.

The buffer is optimized for use with 0.1 - 0.2mM of each dNTP.

Quality Assurance:

Functionally tested in PCR with *Taq* DNA Polymerase and *Pfu* DNA Polymerase.
